

Place Planning

Omeo District Place Plan

Building our Omeo District Place Plan

We are working with your community to create a Place Plan – a practical, easy-to-read guide that brings together local community priorities, and Council’s strategic direction into one coordinated plan.

A Place Plan will be the go-to community resource for aligning ideas and proposals with Council’s existing strategies and plans, helping to strengthen future engagement.

We’d love your input!

Step 1. Values and character

What do you most like about living in Omeo District? When you think about Omeo District, what stands out as distinctive or different about your town? What matters most to you about this area?

Step 2. Vision and the future

In five to 10 years’ time, what would Omeo District look and feel like?

Step 3. Action areas

What needs to happen to achieve that vision and meet the values & character you've identified?

Step 4. Council services

What are the key services for Council to focus on in the Omeo District? What are the priority areas of work to you? What do you think could be a higher priority, what do you think could be a lower priority?
